

IT Group: Membership Survey – April 2018

Hardware

Members explicitly mentioning the use of a desktop computer were surprisingly low (2). How things have changed!

The use of tablets, especially iPads, was quite high (8)

The use of smart phones was common: iPhone 5, Android 6.

Other hardware mentioned were: echo dot, go-pro, drones & security cameras.

Surprisingly, nobody mentioned using a laptop, although we assume all Window users were.

Software

The majority of the members were using Microsoft Windows (14): 6 were using Windows 7 and 8 Windows 10.

Nobody mentioned using Mac OS used on Apple laptops and desktops (iPads and iPhones use iOS)

Microsoft Office (including Word) was mentioned by 5 members; although we suspect this was under represented.

Interests

7 members expressed an interest in photography and 2 in videography.
